COMPLIANCE ADVISORY

Notice of Amendments to Rule 67.4 Metal Container, Metal Closure and Metal Coil Coating Operations

On September 20, 1994, the Air Pollution Control Board adopted amendments to Rule 67.4, an existing rule that regulates emissions of volatile organic compounds (VOC's) resulting from metal container, metal closure and metal coil coating operations. The amendments correct deficiencies identified by the Environmental Protection Agency (EPA).

These amendments will accomplish the following:

Letterpress coatings	Define a special coating category for letterpress coatings. Add a test method for letterpress coatings developed by the District and approved by EPA.
VOC content limits revised	Revise VOC content limits for "Pet-Food" and "Non-Food" containers for consistency with the Reasonably Available Control Technology/Best Available Retrofit Control Technology Guidance Document developed pursuant to California Clean Air Act requirements.
Recordkeeping requirements	Provide an option for keeping monthly rather than daily records of usage of VOC-containing materials.
Combined capture and control efficiency	Update provisions for add-on emission control equipment to specify a combined capture and control efficiency for VOC collection and destruction systems.
Test methods updated	Update test methods and definitions.

For more information, please call the District's Compliance Division at (619) 694-3340.

For a copy of Rule 67.4, please call (619) 694-3307.
